Who We Are

Stone Age Manufacturing, Inc. is a family-owned and operated business, whose background is in masonry and fireplace construction. Our original product, the Stone Age fireplace, arose from needs in the marketplace identified through our own experiences in the field with our affiliated business, Rider Stone Company, a natural stone supply and masonry installation company specializing in custom designs and projects, which has been operated by our family for three generations. Stone Age products have been well received throughout the construction and hardscape industries and we have enjoyed significant growth each year since our incorporation.

Recognition of the challenges typically faced in real-world installations continues to drive our product development, as all Stone Age products are designed to offer a faster, more efficient and more durable way to construct popular hearth and outdoor room products, while delivering greater consistency and higher quality than comparable products or traditional construction techniques.

Stone Age Manufacturing takes pride in our heritage as a family-owned business, and is committed to using our extensive knowledge and masonry expertise to produce the finest quality products available, while delivering exceptional value at a reasonable cost, and providing outstanding personal service to each of our customers.

Stone Age Manufacturing is located in the Tulsa, Oklahoma metropolitan area, and is proud to manufacture our products in the United States of America, using materials produced in the U.S.A.

What We Do

Stone Age Manufacturing, Inc. produces pre-engineered masonry fireplace kits for indoor and outdoor applications, as well as fire pits, brick and pizza ovens, and kitchen island systems, all in kit forms designed for ease of assembly by experienced masons or novice installers, while providing strength, durability and outstanding performance in all climates and conditions.

Each Stone Age product is designed for compatibility with our other components, allowing endless flexibility in project design and easy customization to meet the unique requirements of any installation, regardless of architectural or design style. Stone Age also offers a full line of accessories, carefully chosen to enhance the performance and enjoyment of our products.

Stone Age Manufacturing, Inc. offers a group of products that increase productivity and profits, prevent quality issues and installation difficulties, and enhance the professional reputation of the contractor or installer. Stone Age products offer the consumer a complete outdoor lifestyle system uniquely adaptable to their specific needs, designed to deliver outstanding performance and years of relaxation and enjoyment.

Mission Statement

Stone Age Manufacturing, Inc. strives to create products which offer a faster, more efficient and more durable way to construct popular hearth and outdoor room products, while delivering greater consistency, higher quality, and greater value than competing products or traditional construction techniques. Stone Age also strives to provide outstanding customer service, treating our customers as we would want to be treated ourselves.

Operational Goals

- To be the leader in development and production of masonry indoor and outdoor living products.
- To design products that assemble quickly and easily, offering labor savings and increased profit margins to the installer and cost savings to the consumer.
- To design products which perform well under a broad spectrum of operating conditions and unique installation configurations.
- To produce the highest quality products available at a competitive price, without sacrificing product integrity.
- To build and maintain product inventory levels that allow quick and convenient delivery on all orders.
- To constantly improve the quality and production processes of our existing product line.
- To produce a variety of products and options that offer the greatest value possible to a wide range of potential customers.
- To continually build a brand name that customers recognize, associate with quality, and seek out.
- To deliver outstanding customer service to all customers at all times.
- To earn the reputation of a company that all of our customers would prefer to do business with, and would refer to their friends and associates.
- To offer a wealth of marketing and educational materials to our dealers, distributors, and contractors, to increase knowledge and understanding of the quality and value of Stone Age products, assisting in the sale of our products and the sale of projects using our products.

New Age™ Indoor Fireplaces

New Age™ Indoor fireplaces deliver outstanding performance, excellent quality and exceptional durability, in a form factor optimized for indoor applications, and may also be used in outdoor applications requiring a zero-clearance fireplace. New Age™ fireplaces use a heavy-duty, reinforced solid-wall construction, and are made from Stone Age's proprietary high-temperature tolerant, high-strength concrete mix (over 3500 psi), which results in a much stronger and more durable fireplace than lighter weight products that may look similar at a glance. Some manufacturers may tout lighter weight as an advantage, but we believe our stronger, denser concrete formula and heavy-duty construction yield a fireplace that will perform better with a longer life expectancy, giving the homeowner additional peace of mind knowing they have the highest quality fireplace on the market.

New Age™ models are tested to UL-127/ULC-S610 and UL-103, and are certified as zero-clearance fireplaces, allowing framing directly to the units, if desired, and may be used with our masonry chimney flue sections or with UL-103 metal flue systems. New Age™ fireplaces have also been tested to ICC-ES AC156 for tolerance to seismic activity.

Available with 36”, 42”, 48” 60” and 72” firebox opening widths. Firebox opening heights are 27” for 36 - 42” kits, 32” for 48” kits, and 41” for 60” - 72” kits. Note that these dimensions are with firebrick installed. Offered with straight lintel only.

Refer to Section 1 of Price List
New Age™ 36” through 48” Fireplaces ship on a single pallet per unit. 48” models will be slightly oversized on their pallets.

New Age™ 60” and 72” kits ship on 2 or more pallets, depending upon size.

Chimney flue and firebrick ships on separate pallets from the fireplace, and smaller accessories generally will be shipped in corrugated paper boxes, depending upon the item.

Once the kit is assembled, finish application may begin. Any masonry-compatible finish, such as stucco, tile, brick, man-made or natural stone, may be applied directly to the kit’s exterior surface.
Model No. NA36IND

Specifications

36" Zero-Clearance Indoor Fireplace, Certified to UL-127 (US) & ULC-S610 (Canada) Standards, and ICC-ES AC156 Seismic Standard.

Compatible with zero-clearance Stone Age masonry chimney or UL-103 Certified metal chimney systems.

Indoor Fireplace Chimney & Chimney Accessories

New Age™ Indoor models are designed to use masonry or UL-103 rated metal chimney flue, and Stone Age has a wide range of chimney components to simplify installation of even the most unique fireplace projects. Clay flue tiles form the heart of the chimney system, with our refractory concrete outer chimney blocks providing the necessary insulation to create a zero-clearance chimney system. A brick ledge is available, to allow masonry finish application to the chimney, without using expensive finish materials in areas where they would not be visible. Offset blocks allow the mason to construct an angled masonry chimney when required for custom applications. For installations where a metal chimney system is preferable, Stone Age offers a masonry-to-metal flue adapter (also called an anchor plate) for use with UL-103 rated metal chimney components. For installations with masonry chimneys extending more than 25 feet in height, install 3/8” to 1/2” thick angle iron across the firebox opening under the lintel piece. Rebar should be placed in reinforcement holes, and anchored to the concrete slab, and all holes should be filled with mortar around the rebar on the firebox, throat and chimney.

Note: The 72" model uses 2 chimney flue systems placed side-by-side. Please order 2x the linear feet of flue required for the project.

Recommended Accessories: Chimney cap, Ash Dump, Clean Out Door, Outside Air Kit.

Web: www.stoneagemanufacturing.com Email: info@stoneagemanufacturing.com
The Stone Age fireplace was born of a desire to simplify fireplace construction for masons and consumers, while delivering consistently outstanding quality and performance in outdoor applications.

Superior design and materials are the hallmark of Stone Age products, and this dedication to quality begins with our fireplace kits.

All of our fireplace kits are made from Stone Age’s proprietary high-temperature tolerant, high-strength concrete mix (over 3500 psi), with reinforced solid wall construction, which results in a much stronger and more durable fireplace than lighter weight products that may look similar at a glance. With Stone Age, you’ve got a product you can be confident in for years to come.

Our elegantly simple designs draft well in outdoor conditions, with minimal smoke spillage into the viewing area of the fireplace, allowing consumers to enjoy their fireplaces at times when owners of lesser fireplaces might be forced indoors.

Our Veranda™ and Patio Series™ models further simplify construction for the do-it-yourselfer without compromising quality or performance.

Outdoor Fireplace Models

Indoor & Outdoor Fireplace Models
Fireplace Construction Overview

Installation of the Stone Age fireplace is very simple. Project and site preparation should include pouring a reinforced concrete footing for the unit, per the instructions included with the fireplace kit. Depth of the pad and specific reinforcement requirements, such as piering, should be determined based on size of the unit, type of finish material to be applied, local soil stability, climate and building codes.

Once the kit is assembled, finish application may begin. Any masonry-compatible finish, such as stucco, tile, brick, man-made stone, pavers or natural stone, may be used with all Stone Age products, and may be applied directly to the outside of the units. Customization is very simple, as standard concrete block may be directly applied around any unit to create a different shape or profile, before application of the finish material.

Packaging and Shipping Information

Stone Age Standard, Contractor Series, Patio, Veranda and New Age™ 39” - 51” Fireplaces, Fire Pits ship on a single pallet per unit.

New Age™ 63” and 75” kits ship on 2 or more pallets, depending upon size.

Smaller accessories generally will be shipped in corrugated paper boxes, depending upon the item.
Stone Age Patio Series™ Fireplaces

Stone Age Patio Series fireplaces are perfect for applications where a simplified, block-friendly solution is required. Offering the quality, durability and performance advantages of the Stone Age fireplace, without the drawbacks of many similarly sized block or other non-certified fireplaces.

Outdoor applications only, 8’ minimum clearance to combustibles required. Maximum of 4 additional feet of chimney may be added to these models.

Available with 24”, 36” or 48” firebox opening width. Firebox opening height is 22”, straight lintel only.

Veranda™ Fireplaces

Designed with smaller settings in mind, Veranda™ fireplaces give the consumer a true, masonry wood-burning fireplace in the smallest functional package available. Its unique tongue and groove pieces allow easy assembly by a mason or the consumer, without traditional mortar. Compatible with all masonry finishes.

Outdoor applications only.

Available with 18” firebox opening width. Firebox opening height is 15 1/2” with arched lintel only.

**Stone Age Contractor Series Fireplaces**

The Contractor Series offers Stone Age design and materials with an emphasis on value. The Standard kit is distilled down to its essential components of fireplace and chimney, and additional items are left optional, to give you a fireplace comparable to competing models with Stone Age quality and innovation.

The Contractor Series is the perfect choice for applications where a customized profile is desired, or for projects where the lower wood storage area of the Standard fireplace is not needed.

UL-127/ULC-S610 Certified for indoor or outdoor applications.

Available with 24”, 36” or 48” firebox opening width, single-sided or See-Thru. Firebox opening height is 28” arched lintel or 22” straight.

Stone Age Standard Model Fireplaces

Stone Age fireplaces are complete kits, with everything needed to construct the fireplace included with the unit, except mortar and finishing materials.

Chimney sections, firebrick, hearth and support legs are all part of the package, to simplify your preparation and installation. Arched lintels are standard, with straight lintels as a no charge option. Also available in See-Thru Models.

UL-127/ULC-S610 Certified for indoor or outdoor applications.

Available with 24", 36" or 48" firebox opening width. Firebox opening height is 28" arched lintel or 22" straight. Also available with Stoned Fire one-piece base.

Stone Age Fireplaces Stoned Fire Models

Stoned Fire kits offer the performance and style of our Standard fireplaces, but feature a base that combines the floor, riser legs and hearth into a single piece, allowing the fireplace to be moved into place after assembly, making it perfect for applications where portability is desirable, such as movable displays. Available with arched (standard) or straight lintels.

UL-127/ULC-S610 Certified for indoor or outdoor applications.

Refer to Section 13 of Price List

New Age™ 5-piece fireboxes allow the experienced mason to greatly speed up the process of scratch-building a fireplace, by removing one of the most labor-intensive steps, creation of the firebox from firebrick. Using our high-temperature refractory concrete, with an integral buff color, the 5-piece firebox can be assembled in minutes. 2-1/2” thick walls provide plenty of insulation, and isolate the heat of the fire from the cinderblock behind it.

Available with 36” or 42” firebox opening width.

Stone Age Brick Oven

Stone Age Brick Ovens are the perfect complement to our other outdoor kitchen components, and allow the outdoor chef unlimited cooking flexibility while incorporating the taste of real wood. Optional top-mount dampers are available, for more precise temperature control and greater cooking flexibility.

Available with 24” firebox opening width, 27” depth. Firebox opening height is 21”, with arched lintel.

Recommended Accessories: Top-mount damper, Stone Age Multi-Purpose Ready-Mix.
The Mezzo™ Pizza Oven offers the same old world flavor of the Amerigo™ in a smaller package that fits the depth of our Cabinet Component System™ island kits, and features an arched cooking chamber with over 800 square inches of cooking surface. Cooking surface measures 27” deep by 30” wide. Kits include firebrick, 9” chimney flue and metal oven door.

### Mezzo™ Pizza Oven

**Item No**: SA-MPO-36  
**Model**: Mezzo™ Pizza Oven  
**Weight**: 1150

Refer to Section 16 of Price List

**Recommended Accessories**: Wood-clad door, Stone Age Multi-Purpose Ready-Mix.

---

The Amerigo™ Pizza Oven has everything you need for old world pizza cooking and more. Featuring an arched cooking chamber and over 1500 square inches of cooking surface, the Amerigo™ complements any outdoor kitchen. Cooking surface measures 36” deep by 42” wide. Kits include firebrick, 9” chimney flue and metal oven door.

### Amerigo™ Pizza Oven

**Item No**: SA-APO-48  
**Model**: Amerigo™ Pizza Oven  
**Weight**: 1650

Refer to Section 16 of Price List

**Recommended Accessories**: Wood-clad door, Stone Age Multi-Purpose Ready-Mix.
Using the same technology as our Cabinet Component System™, the Amerigo™ and Mezzo™ Pizza Oven Cabinets create a solid base with plenty of storage, and are offered with an arched or square opening, or without opening, for custom configurations. Cabinets for both pizza oven models are 44" tall, giving a cooking surface height of approximately 50".

### Amerigo™ Pizza Oven Inner Liner, Access Tunnel & Base Plate Extension Kits

The Amerigo™ Pizza Oven is now easily customizable for the discerning chef.

A one-piece refractory concrete Inner Liner kit with ceramic blanket delivers exceptional insulating properties for increased heating efficiency. Designed to fit inside the Amerigo™ oven dome.

The Tunnel kit creates a traditional entry landing, while lowering and bringing forward the chimney for greater heating control in the front of the oven. Tunnel kit requires the use of the Base Plate Extension kit.

The Base Plate Extension kit creates an extended hearth and landing area, and also facilitates installation of the Tunnel kit. Includes firebrick.

Stone Age Fire Pits

Stone Age offers a wide selection of fire pits for any setting. Simple, three to five piece construction greatly speeds up installations. All models feature extended base plates with molded feet, which may be used to allow movement after assembly or to create clearance and airflow under the unit, as required for installations on wooden structures, or the base may be positioned to place the feet inside the pit if not needed. Three round configurations are available, plus a square model, and optional extension kits to create a rectangular fire pit. Lining with firebrick is recommended for wood burning applications.

Recommended Accessories: Log grate set, firebrick (wood burning applications), coping kits, Stone Age Multi-Purpose Ready-Mix

Web: www.stoneagemanufacturing.com    Email: info@stoneagemanufacturing.com
Stone Age Multi-Purpose Ready-Mix

Stone Age Multi-Purpose Ready-Mix is a comprehensive blend of refractory mortar and other additives, specifically formulated for the construction and finishing of all Stone Age products. Designed to withstand the high temperature conditions encountered by wood burning hearth products, Stone Age Multi-Purpose Ready-Mix provides superior performance in fireplace, fire pit or oven joints, as well as firebrick installation, and allows plenty of working time without the risk of flash setting. The Stone Age Ready-Mix incorporates a bonding agent to facilitate the adhesion of finishing materials on any Stone Age hearth product or kitchen island kit, and is also formulated for low moisture absorption after curing. A complete, start-to-finish mortar blend in a single package, simply mix with water and you are ready to assemble and finish any project, large or small. Approximately one hour working time, and the mix may be rewetted once per use. Recommended for building and finishing all Stone Age kits.

Firebrick & Adhesives

Stone Age offers firebrick for hearth and cooking products, and adhesive for the Cabinet Component System™ and Veranda™ kits.

Stone Age Refractory Panel Kits

Stone Age Refractory Panel Kits were created to replace the traditional firebrick in our outdoor fireplace kits, greatly speeding up kit assembly, while removing one of the more challenging aspects of fireplace installation for the non-mason. Colored with an integral pigment that captures the look of real firebrick wall and fireclay. Available for Standard, Contractor and New Age™ Outdoor fireplace models.

Fire Pit Log Grates

Log grates elevate the logs inside the fire pit, allowing more airflow through the fire for more complete combustion, and are available to fit any Stone Age fire pit model. All grates are constructed of welded carbon steel, and have a high-temperature black finish.
The Cabinet Component System™ creates infinitely configurable kitchen islands, featuring our patented, glass fiber reinforced concrete panels and bracket system. Kitchen Island installations are greatly simplified, giving faster build times and lower labor cost, while delivering strength and durability far superior to any other system available. Kits may be combined or modified to create custom designs or fit unique applications. Basic assembly takes minutes, and appliance openings may be cut immediately after the panels are set, using standard masonry saw blades. Finishing may begin immediately after cutting has been completed, and appliance installation may start as soon as the finish materials have dried.

For best results, Stone Age recommends using our concrete adhesive for all Cabinet Component System™ installations.

</tr>
</tbody>
</table>

Estimated Time for Construction Steps 1 - 6 as Shown:

20 Minutes for Experienced Installer.

Common Dimensions for All Models

Kits are listed in 3’ width increments, with sizing referring to the shortest side, which is normally the front or appliance side of the unit. All models are available with or without top panels of the same material as the sidewalls. Kits with tops are recommended for installations where countertops 3” thick or less will be used, to give extra support to the finished countertop material and appliances; however, the installer may make the final decision regarding the use of kit tops. All kits are 33” deep and 36” tall with top or 34” tall without tops.
The STR Series straight islands are available in lengths of 6, 9, 12, 15 and 18, and like all Cabinet Component System™ islands, may be expanded by combining multiple kits.

Radiused Series Island Kits and Individual Sections

Stone Age Manufacturing brings an exciting new level of innovation to outdoor living with our Radiused Series island kits, end caps, and individual island sections, adding a dimension to outdoor kitchen design previously unavailable in modular masonry construction.

Based on a 30° radius, each section is approximately 36” wide on the longer or outer side and 18” wide on the inner side, while maintaining the same height and depth dimensions as other kits in the Cabinet Component System™ line.

Several complete kit models are offered, and individual sections may be combined with standard Cabinet Component System™ island kits and radiused end caps, to create any outdoor kitchen layout the designer can envision.
The Radius Series islands offer flexibility in design never before available in modular masonry kits, and may be further customized by combining multiple kits and configurations.

Note: Radiused Series kits include 2 Radiused End Caps.

Radiused Island Sections

Radiused Series islands sections are offered as kits in 30° increments, up to 180°, and are intended for applications where they will be combined with additional radiused sections to create circular layouts of greater than 180°, or with standard Cabinet Component System™ kits, for unique, highly customized island layouts.

Radiused Island Section kits do not include end panels or Radiused End Caps.

Kits are 33"d x 36"t (W T) or 33"d x 34"t (W O T)

Refer to Section 29 of Price List
Radiused End Caps and Backsplash Kits

Radiused End Caps

Radiused End Caps may be added to create a unique finishing touch to any Cabinet Component System™ island kit, and may also be used to create stand-alone tables or fire and cooler features.

Radiused End Cap kits do not include Radiused End Backsplash or Bar Top Backsplash.

Kits are 33"w x 16 1/2"d x 36"t (W T) or 33"w x 16 1/2"d x 34"t (W OT)

Refer to Section 29 of Price List

Backsplash Kits

Cabinet Component Backsplash kits are offered in two configurations, standard backsplash and backsplash with bar top. Kits vary in length, depending upon model. Multiple kits can be added to any Cabinet Component System™ island. Kits are 8 inches tall, and when assembled, have a 2 inch by 6 inch interior space that can be used as an electrical chase. Bar top backsplash kits feature a 6 inch overhang with metal bracketing for extra stability.

Available in straight, radiused, reversed radiused, and radiused end configurations.

Ceramic Cooker Island Kits

Ceramic Cooker Island Kits eliminate the difficulties of installing these popular charcoal grills in an outdoor kitchen island. Our kits are configured with an open front for easy access to lower air vents, but can easily be configured with doors to match the other appliances in an application. The 22” diameter top cut-out fits the most popular sized round cookers, or may be modified to fit oversized or oval designs.

Item No  Model                 Weight
SA-CERC  Ceramic Cooker Kit    850

Refer to Section 32 of Price List

Counter Height Extension Kits

Counter Height Extension Kits offer a simple and effective solution when taller countertops are desired. Kits are 36” wide by 33” deep by 6” tall, and are installed directly on the island kit walls, with the island’s countertop placed on top of the extensions.

Item No  Model                 Weight
SA-CHE  Height Extension Kit   95

Refer to Section 32 of Price List

Column & Seat Wall Kits

Column and Seat W all Kits quickly create beautiful accents, while greatly simplifying the application of masonry finishes, and may be incorporated into walls, fencing or other applications. Column Kits are 36” tall by 14” wide, and 12” height extension kits are available if taller columns are desired. Seat W alls are easily created using our 36” wide by 12” deep by 18” tall kits, and can be trimmed to fit any angle or radius.

Item No  Model                 Weight
SA-TC-3  Column Kit            176
SA-CEXT  Column Extension Kit  60
SA-SW-3  Seat W all Kit        170

Refer to Section 32 of Price List
Little Pig™ and Big Pig™ Cabinet Smokers

The Little Pig™ and Big Pig™ Cabinet Smokers are the ultimate set up for low temperature (low & slow) smoking.

Comprised of a heavy steel framework with multiple access doors, and a thick refractory outer shell for maximum temperature stability, these smokers combine a large number of features never before available in a kit configuration, to give smoking performance far superior to any other smoker, in a package that will fit into any outdoor setting.

Multi-point air vents give you precise control over temperature. The Little Pig™ offers 4 cooking positions, with 4 18” x 20” cooking racks, for plenty of cooking surface in a smaller package. The Big Pig™ features 5 cooking positions, and includes 5, 18” x 20” cooking racks and a hanging hook, for whole pigs or larger cuts of meat. Separate doors for each section allow individual adjustment of the firebox, liquid/drip tray and cooking racks. The heavy, 1/4” thick metal face, doors and main framework are designed to last a lifetime. Heavy duty, spring-loaded latch handles, with wire stove handle grips and a high-quality thermometer round out the long list of features included with these units.

The refractory outer shell features 6” thick walls, which help maintain a constant temperature, allowing you to check the food, add wood or liquid, and make other adjustments, without the heat loss typically experienced when opening an all-metal smoker. Opening the doors result in a momentary temperature drop, that quickly returns to the desired temperature, without the need to adjust the air control. The refractory shell is designed to accept any masonry compatible finish, allowing the smoker to be seamlessly integrated into the décor of the rest of the outdoor kitchen or room setting, or function as a standalone unit.

LIMITED WARRANTY
The products of Stone Age Manufacturing, Inc. (“Stone Age”) have been carefully manufactured and the components assembled to give the customer a quality product. Stone Age warrants to the original purchaser the materials that it provides to the customer against defects in manufacture for a period of twenty-five (25) years from the date of purchase on UL-127 listed fireplaces, for a period of five (5) years from the date of purchase on all unlisted fireplaces, fire pits, and other masonry components. Other accessory items or components offered, but not produced by Stone Age Manufacturing, Inc., shall be covered by their manufacturer’s warranties. This Limited Warranty covers only actual manufacturing defects in the Stone Age product and does not cover defects or faulty workmanship in the installation of the product or the masonry or other structure in which it is installed. Also this warranty does not cover items that have been damaged due to over-heating, modification, improper storage or maintenance. Stone Age shall repair or replace, at its option, any defective Stone Age product component upon receipt of written notice addressed to Stone Age. This Limited Warranty covers only replacement of any defective components within the product itself occurring during the warranty period and does not cover the cost of installation or removal from a fixed location. NO OTHER WARRANTIES, EXPRESS OR IMPLIED, ARE MADE, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR PARTICULAR PURPOSES WHICH ARE SPECIFICALLY DISCLAIMED. Stone Age is not liable for damages or injury to persons or property or other incidental or consequential damages.
